

ismet sari

Computer Engineer

I am currently a computer engineering student at Boğaziçi University. My biggest and only goal is to turn the theoretical knowledge I have received in my country into practice in a company that uses the best technologies. I have experience in Cloud Computing and I want to develop myself in this field of technology and eventually become a Cloud architect.

EDUCATION

Bachelor's degree Boğaziçi University

06/2016 – Present

Istanbul/Turkey

Courses

- Computer Engineering

WORK EXPERIENCE

System Administrator(Intern) Doğus Technology

07/2019 – 09/2019

Istanbul/Turkey

Achievements/Tasks

- I was responsible for managing all VM's used by companies of Dogus Holdings such as Online sale, Construction Automotive etc. By writing Ansible codes with extension yml or yaml I had made the process of creating and installing necessities on the VM's automatic. I had created an UI so that the user without any computer knowledge can create and install necessary programs on the VM's.
- Maintain and administer computer networks and related computing environments including computer hardware, systems software, applications software, and all configurations.

SKILLS

Python3

Ansible
